

Vandana Vankhede

Full Stack Developer

+91 8735863403 | vsvankhede06@gmail.com

PROFESSIONAL SUMMARY Highly skilled and accomplished software engineer with expertise in **React, JavaScript, and Java**. Proficient in Git, Jira, and Agile development methodologies. Experienced in full-stack development and building user-friendly web applications. Proven track record of success in developing and implementing complex software projects.

PROFESSIONAL EXPERIENCE **Open Source Contributor, Udaan (April - Present)**

- Actively contributing to an open source project at Udaan since April, focusing on upgrading the project and node modules.
- Contributing to code quality, testing, debugging, and providing feedback on design and architecture.
- Worked on snorql, resolving bugs, upgrading to the latest version of Node.js and dependencies.
- My contributions have been well-received, and I have gained valuable skills in React.js, Javascript

Software Engineer (React, Javascript, Java) July 2022 - Present
Sonetel, Hyderabad, India

- Skilled in React and full-stack development with Java and React.js.
- Developed a Call Recording Page with features such as audio recording download and backup functionality.
- Built a Train AI page that allows users to upload, download, and delete training data, improving the accuracy of the AI's learning algorithm.
- Currently developing a meeting minutes system that converts audio into transcriptions and provides a summary of the meeting description and objectives using GPT.
- The system offers users easy-to-use audio transcriptions, automatic meeting summaries, and key information extraction.
- Collaborating with cross-functional teams to create an intuitive interface and improve accuracy.
- Continuously testing and refining the system to provide the best experience for users.

PROJECTS **CryptoHive (<https://cryptoapp-drab.vercel.app/>)**

CryptoHive is a crypto web app created using **JavaScript, React, and Chakra UI**. It provides real-time updates every 10 seconds, official sites for all cryptocurrencies, and current market prices for each coin. The app features graphs that illustrate the price of each coin over various time periods and displays important data such as market cap, max supply, circulating supply, and all-time low and high prices. Users can also see the rank of each coin in the market and access the official websites of all exchanges where each coin is traded.

Additionally, the app highlights whether the price of a particular coin has increased or decreased, enabling traders and investors to make informed decisions about buying and selling. With its intuitive design and user-friendly interface, CryptoHive is the perfect tool for anyone interested in keeping track of the latest market trends and making informed investment decisions.
